

NEWSLETTER RECREATE #1

Enhancing the Circular Economy Model for the Collection and Recovery of Fiber-Reinforced Composite Waste

The RECREATE project addresses the challenge of transitioning to a circular economy proposed by the Interreg VI-A Italy-Slovenia Program area, by introducing a circular economy model dedicated to fiber-reinforced composite materials (CFR). RECREATE aims to increase environmental sustainability by reducing waste production and improving the management of existing CFR waste, marking a step forward towards a greener and more sustainable future.

The 5 partners of the Interreg RECREATE project are Italian: Polo Tecnologico Alto Adriatico Andrea Galvani scpa, Gees Recycling Srl, COMUNE DI SPINEA, and Slovenian: OBRNO-PODJETNIŠKA ZBORNICA SLOVENIJE, TECHNOL, a company for engineering and production of products from synthetic materials, Portorož d.o.o., Slovensko deželno gospodarsko združenje – Unione regionale economica slovena.

Kick-off Meeting

The kick-off meeting of RECREATE was held at the headquarters of the Lead Partner Polo Tecnologico Alto Adriatico Andrea Galvani. The purpose of the RECREATE project is to improve the outcomes of the RETRACKING project, particularly by applying the circular economy model of recycling FRC (fiber-reinforced composite) waste at two pilot sites: one managed by a Municipality with urban waste collection and the other by a Slovenian private company producing industrial FRC waste.

Recycling of Composite Materials: Cases and Prospects

The first public presentation of the RECREATE project took place at the Urban Center Center in Trieste. On this occasion, the technology supporting the new circular economy model proposed by RECREATE was presented; it hosted expert speakers in waste management from Italy and Slovenia, and the evaluation of sustainability criteria by banks and companies. The event concluded with an open discussion session among participating companies and informal meetings at the end.
