Srednješolsko Interreg tekmovanje

PRILOGA 4A – Obrazec za projektno idejo *Slovenščina in angleščina*

Avgust 2024

0. Osnovne informacije:

Šola: DIZ Simon Gregorčič

Šolska smer: znanstveni licej

Letnik: 4.

Izbrana tema: 1. Informacijske in telekomunikacijske tehnologije

Akronim projekta: DOSLA (Dobrodelni slavček)

1. Opis projektne ideje.

Zamislili smo si aplikacijo za dobrodelne akcije na našem čezmejnem teritoriju (Gorica-Nova Gorica), ki bi bila uporabna v vseh šolah in v različnih kontekstih. Naša aplikacija bi povezovala dijake višjih slovenskih in italijanskih šol v Gorici in slovenskih v Novi Gorici in bi bila dostopna lokalnim skupnostim ter humanitarnim organizacijam. Ustvarila bi povezavo med tistimi, ki potrebujejo pomoč, in tistimi, ki jo lahko nudijo, zato bi bila s socialnega vidika zelo koristna. Jezik bi bil trojezičen: slovenščina, italijanščina in angleščina. Naša projektna zamisel je ekonomsko, socialno in ekološko trajnostna.

2. Kako učinkuje na skupnost? S katerimi problemi, vprašanji in izzivi se sooča?

Naš projekt se sooča s splošno potrebo po druženju, izmenjavi mnenj, z odpravo individualizma in skuša dati svoj doprinos ljudem, ki so v stiski; naš namen je povezati mlade prostovoljce iz obeh Goric, to čezmejno sodelovanje je ključno, predvsem iz osnovnega razloga, ker sta bili Gorici nekoč ena sama resničnost in ker je povezovanje mladih iz različnih kontekstov spodbudno, nujno in potrebno, ker predstavlja pravo bogastvo in je koristno tudi za tiste, ki nudijo pomoč in ne samo za prejemnike. Ker je naša aplikacija prilagojena manjši skupini, je veliko lažje koordinirati sodelovanje. Čeprav ta projekt predstavlja velik izziv, je stvaren in izpolnjiv in bi bil za skupnost zelo pozitiven.

3. Katere dejavnosti predvideva projekt?

Naš projekt spodbuja aktivno sodelovanje mladih, saj bi bila naša aplikacija razdeljena v štiri razdelke in tako zastavljena:

1. Kotiček »dobrodelnih prizorišč«, in sicer navedba krajev, kjer sprejemajo dobrine za pomoč potrebnim;
2. Kotiček »dobrodelnih dogodkov«, kjer bi naravno obveščali o raznih dobrodelnih tekmah, koncertih itd.;
3. Kotiček »čezmejne kulinarike«, kjer bi mladi slovenskih in italijanskih šol pripravili značilne jedi našega območja, jih prodali in izkupiček dali v dobrodelne namene;

4. Kotiček »dobrodelnega časa«, kjer bi dijaki nudili svoj prosti čas starejšim osebam (razlaga uporabe tehnologije, majhna opravila idr.), starejši občani pa bi v zameno pripovedovali zgodbe iz preteklosti, premišljevali o nekdanji meji itd.

Vsak dijak, ki se pridruži dobrodelni akciji, bo po opravljeni dejavnosti dobil določeno število točk. Točke se bodo zbirale skupno in ko bomo dosegli določeno vsoto, bomo pripravili skupno srečanje in praznovanje.

4. Kateri partnerji (združenja, društva, šole, univerze, ustanove, itd.) bi lahko bili soudeleženi pri projektu?

Mislili smo aktivirati naslednje šolske zavode in ustanove, in to zaradi poznanstva in že utečenega stika z navedenimi institucijami. Soudeleženi partnerji so naslednji: Višješolski center DIZ Simon Gregorčič, Splošna gimnazija Nova Gorica, Višješolski center Galilei Fermi Pacassi in UNG (Univerza v Novi Gorici). Samoposebi umevno pa je, da bi aplikacija povezovala vse akterje na terenu in bi bila uporabna za vse šole z obeh strani meje. Prav je, da mladi imamo priložnost si izmenjati drugačne poglede na stvarnost, različne izkušnje in znanja, ker pogrešamo pretok informacij in izmenjave mnenj tostran in ostran nekdanje meje; platforma bi pa tudi povezala različne generacije med sabo, da bi se izkušnje starejših in mlajših prepletale. Soudeležene ustanove so: Goriška Caritas, Zeleni križ v Gorici, Civilna zaščita iz Gorice in Nove Gorice, Casa di riposo Villa S. Giusto v Gorici in Dom upokojencev Nova Gorica.

1. Explain your project proposal.

We envision an application to foster charitable initiatives across our cross-border territory (Gorizia-Nova Gorica), which could be used in all schools and in various contexts. This app would serve as a bridge between high school students in Slovenian and Italian schools in Gorizia and Slovenian schools in Nova Gorica, as well as local communities and humanitarian organizations. The aim would be to create a connection between those who need help and those who can provide it, making it very beneficial from a social perspective. The app would be available in three languages: Slovenian, Italian, and English. Our project is designed to be sustainable in economic, social, and environmental terms.

2. How does it affect the community? Which problems, issues and needs does it tackle?

Our project responds to a growing demand for socializing, sharing ideas and eliminating individualism. By connecting young volunteers from Gorizia and Nova Gorica, we aim to foster a sense of unity and support for those in need, especially since the two cities were once part of a single reality. Connecting young people from different cultural contexts is both encouraging and necessary, as it represents true wealth and is valuable not only for those receiving help but also for those providing it. Our app is designed to facilitate easy coordination

within a smaller group, making it a manageable and impactful endeavor. While ambitious, this project is both achievable and essential for our community.

3. Which project activities are foreseen?

Our project fosters active youth engagement through an app with four interactive sections:

- 1) A "donation hub" namely listing places where donations are accepted to help those in need;
- 2) A "charity events" calendar featuring charity-focused activities such as races, concerts etc.;
- 3) A "culinary corner" where both Italian and Slovenian students can showcase local cuisine and raise funds for charity;
- 4) A "time exchange" section, where students would offer their free time to assist elderly people (teaching them how to use technology, helping with small tasks, etc.), while the elderly would, in return, share stories from the past, reflect on the former border, etc.

Each student participating in these activities will earn points for their contributions. The points will be collected collectively, and once a certain total is reached, we will organize a group meeting and celebration.

4. Which partners (organization, club, school, university, institution etc.) could be involved in the project?

We aim to engage the following schools and institutions as partners in this project, leveraging our existing connections and established relationships with them. These include the Higher Education Center DIZ Simon Gregorčič, Nova Gorica General Gymnasium, the Higher Education Center Galilei Fermi Pacassi, and UNG (University of Nova Gorica). The app will facilitate collaboration among all stakeholders on the ground and benefit schools on both sides of the border. By involving young people, we aim to give them the opportunity to exchange views on their shared reality, diverse experiences, and knowledge. This is important because there is a lack of information flow and exchange of opinions across both sides of the former border. The platform will also help bridge generational gaps, allowing the experiences of older and younger people to be intertwined.

Partner organizations include: Goriška Caritas, Green Cross in Gorizia, Ad Formandum; Civil Protection from Gorizia and Nova Gorica, Casa di riposo Villa S. Giusto in Gorizia, and the Nova Gorica Retirement Home.
