

Tour A

Study visit to the Valle Cavanata Regional Natural Reserve

16 April 2026

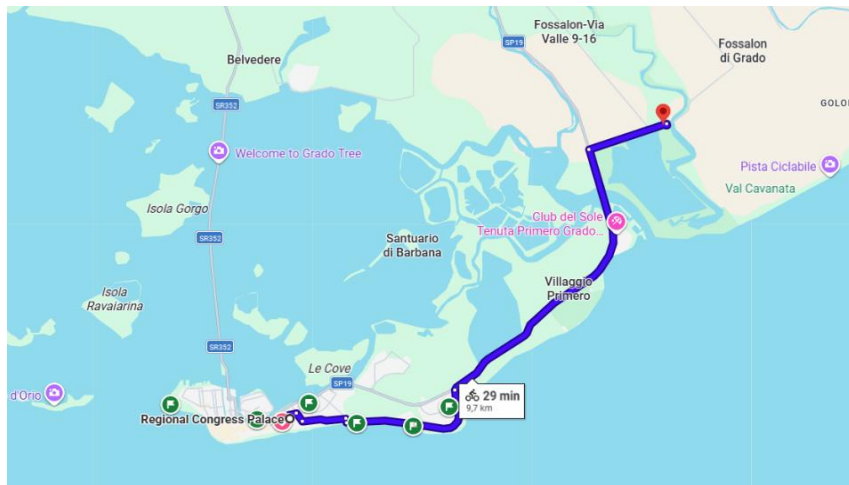

Tour A - Study visit to the Valle Cavanata Regional Natural Reserve

Excursion along the bike and cycle-pedestrian path from Grado (Palazzo dei Congressi – event venue) to Fossalon (Visitor Center), along the international cycle route **FVG2 Adriabike**.

Participants will be divided into 4 groups of about 15 people, each accompanied by a cycling tour guide. The guided visit in the Valle Cavanata Nature Reserve will be in English and will last about one hour.

The visit includes:

- Visitor Center,
- Birdwatching observation points
- The route along the Averte canal up to the panoramic embankment overlooking the sea.

Map data © Google

Difficulty and accessibility: easy and suitable for people of all ages. However, it is not accessible to people with mobility disabilities.

Means of transport: trekking bicycles (not electric - e-bikes). In case of bad weather: transfer will be made by bus.

Special requests: for organizational and insurance reasons, participants will be asked to provide their height and tax code or first name, last name, place and date of birth.

Recommended clothing:

- Comfortable sports or casual clothing suitable for outdoor movement
- A windbreaker waterproof jacket is recommended in case of variable weather
- Camera and binoculars (optional)

Distance: 10 km (flat track with no gradients)

Duration: approximately 2 hours (30 minutes of cycling and 1 hour of guided visit)

About the site of the visit

The Valle Cavanata Nature Reserve in Fossalon (GO) is a protected area established in 1996 and covers 341 hectares, including a marine section. Within the Oasis, visitors can access the Visitors' Centre, use the birdwatching hides, and walk along the Averte Canal up to the panoramic embankment overlooking the sea.

The OSI project ADRIONCYCLETOUR and the study visit

The OSI project finances the lightning along the cycle route FVG2, on the bridge connecting Grado with the mainland. The route is connected to other routes along which the OSI and other Interreg IT-SI projects financed cycling infrastructures and services.
